

JacanaForms

Comprehensive electronic forms solution for iSeries businesses

Cost Savings

Reduce capital expenditure on pre-printed forms, checks and label inventory; buy fewer forms; lower paper storage costs; reduce forms administration and distribution costs; reduce obsolescence costs; cut forms design expense and introduce lower operating costs of laser printing.

Competitive advantage

Competitive advantages - refine presentation and modify form output to meet changing business requirements - improve customer service and satisfaction. Easily add messages or special offers.

Productivity gains

Productivity gains - changes can be made 'in house' and on screen - responding to changes in telephone numbers or resulting from company mergers or office moves in minutes!

Improved presentation

Improved presentation quality of internal management and external customer reporting.

Multiple Output formats

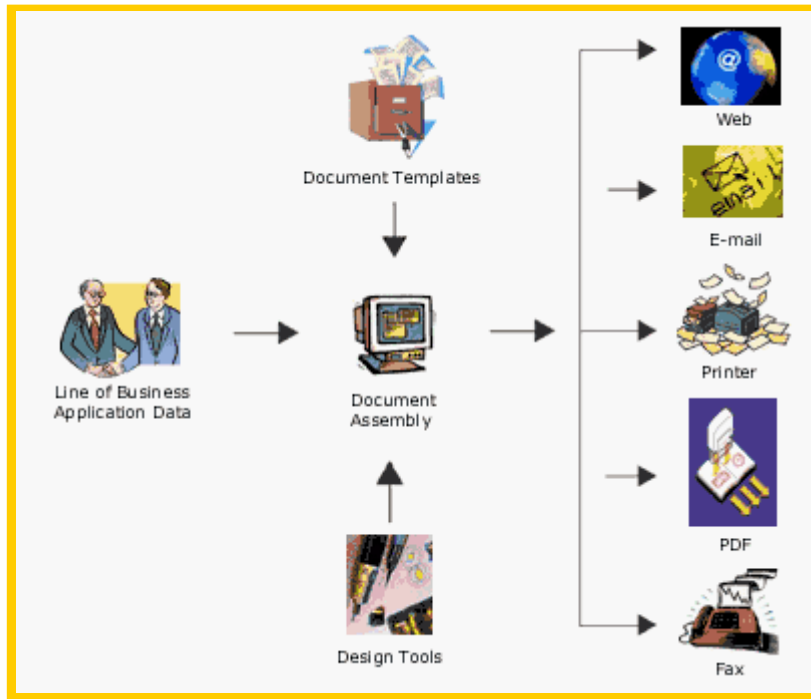

Multiple Output formats - to produce outputs suitable for print, Web, Email or Fax

MAPICS Ready

Predefined report templates for most commonly required forms enables you to get up and running quickly and easily

"With JacanaForms, modifications are easy to make, and we don't have to worry about finishing the current inventory of pre-printed stationery before we can make a change. We are already saving \$8,000 annually on pre-printed forms just by changing over our invoices and quotes."

Arlene Merritt - Business Analyst at Lovejoy Inc, USA

Features Include:

- Extensive form processing capabilities (graphics, bar codes, logos, watermarks, multi-part forms)
- Intelligent dynamic form presentation conditioned by the data
- Multiple document types produced from a single data stream e.g. an invoice, packing list and credit memo
- Reduced network traffic as data streams only contain data
- Use of special print drivers to ensure fast forms printing
- Employment of Printer features such as duplexing, tray selection, flash RAM are supported
- Full support for color and color graphics printing
- PDF and HTML output formats handled
- Interfaces to leading fax and e-mail technologies
- Seamless management of data extraction, form design merge and output to printer or other delivery vehicle
- Uniquely integrating with Info WorkPlace report writer you no longer have to rely solely on producing e-forms from existing spool outputs.
